

MUHAMMAD MAAZ ALI

Full-Stack Web Developer | Reactjs | Nodejs |

Multan, Pakistan | +92-03166880883 | maazali8878@gmail.com | linkedin.com/in/maaz-ali-73280a3404

SUMMARY

Highly motivated and detail-oriented Software Engineering student with a strong academic foundation and hands-on experience in full-stack web development. Equipped with extensive knowledge of front-end architectures, server-side logic, and modern database configurations. Proven track record of building user-friendly web applications, collaborating efficiently within technical teams, and solving real-world digital problems. Passionate about continuous learning, writing clean maintainable code, and implementing scalable software solutions.

EDUCATION

NFC Institute of Engineering & Technology

Multan, Pakistan

Bachelor's Degree in Software Engineering

Expected Graduation: 2027

TECHNICAL SKILLS

Web Development: Full-Stack Web Development, Front-End Development, React.js, Node.js, Express.js, JavaScript (ES6+), HTML5, CSS3

Databases & Tools: MySQL, MongoDB, RESTful APIs, Git, GitHub, MS Office Suite (Excel, Word, PowerPoint, Access)

Core Concepts: Object-Oriented Programming (OOP), Programming Fundamentals, Software Architecture, System Design, Data Structures, Problem-Solving, Cross-Functional Team Collaboration

PROFESSIONAL EXPERIENCE

Arise Ability

Multan, Pakistan

Full-Stack Developer Intern

2023 – Present

- Actively participated in cross-functional project planning, gathering client requirements, and defining milestone execution schedules to ensure timely project delivery.
- Engineered functional, modular, and highly responsive user interfaces utilizing HTML, CSS, and modern JavaScript practices.
- Collaborated closely with senior developers to bridge the gap between UI/UX wireframes and robust server-side data integrations.

ACADEMIC PROJECTS

Apni Society - Smart Society Management System

React.js, Node.js, Express.js, MongoDB, MySQL, REST APIs

- Developed a full-stack platform featuring visitor tracking, resident management, and secure authentication to streamline residential operations.
- Built responsive user interfaces and integrated backend REST APIs for real-time data interactions

Plant Disease Recognition System

Python, Machine Learning, TensorFlow/Keras, OpenCV, Flask, Node.js

- Built an intelligent agricultural software application utilizing digital image processing and custom machine learning classification models to aid farmers.
- Engineered image preprocessing pipelines that allow the system to accurately analyze crop leaf images, diagnose anomalies, and supply actionable diagnostic data early on.

Learning Management System (LMS)

React.js, Node.js, Express.js, MongoDB, MySQL, REST APIs

- Programmed a multi-tier learning platform built to manage institutional courses, instructor portals, homework tracking, student enrollments, and performance analytics.
- Designed and configured granular role-based access control (RBAC) along with strict token-based authentication to manage administrative permissions securely.
